

BUILDING AND SUPPORTING CLIMATE RESILIENCE IN UPPER RHINE LIVESTOCK FARMING

The objective of the KLIMACO project is to identify, analyse, disseminate and support the implementation of climate change adaptation strategies. The aim is to strengthen the technical, economic, environmental and societal performance of livestock farming in a context of rapidly changing climate.

5 AREAS OF FOCUS

= 5 cross-border groups bringing together experts in each theme

Complementarity and transversality are the key elements of the KLIMACO partnership, which brings together complementary expertise to collect, create and promote references and tools; to gather and disseminate knowledge, recommendations and testimonials.

20 PARTNERS

KLIMACO includes dairy marketers in the construction of recommendations to sustain milk production in the context of climate change, reduce the environmental impact of farms and seek to increase market opportunities.

DISSEMINATION OF RECOMMENDATIONS IN TERMS OF ADAPTATION TO CLIMATE CHANGE

Videos, testimonials, Workshop, etc.
